Project Proposal for
ICT Training to 200 Unemployed
Women in Kawempe Division

Name of organization: Integrity Youth Forum Uganda (IFU)
Address of organization: P.O.Box 22086
District: Kampala, Uganda
Phone: +256 7044 61828, Mobile: 256 7849 30987
Email: integrityforumuganda@gmail.com
Website: www.ifunet.wordpress.com

Executive summary: Integrity Youth Forum Uganda (IFU) is a self-governing, on-profit professional body for training youth in Information and Computer Technology (ICT) and Education Career Guidance (ECG). IFU is registered under the Government of Uganda as a company limited by guarantee, established in 2014 with a view to help the vulnerable youth, women, girls and children through different development approaches.

The project will be implemented in ten (10) parishes of Kawempe Division, Kampala district targeting vulnerable and unemployed women and girls who have dropped out of school with minimal level of education. We have not enough of financial resources for extending support to address the issues which are important for the targeted women.

Organization Capacity: IFU has a team of human resource who are well qualified and experienced for project implementation. The organization follows regular monitoring, sharing experiences and immediate action for the successful implementation of project activities. IFU specifically targets to ensure its support to the development of women, youths and children to build their capacity and skills.

Project title: ICT Training to 200 Unemployed Women and Girls in Kawempe Division

Project summary: By the end of this project, 200 unemployed and unskilled young women and girls who have attained some level of education will be trained and
skilled with computer basics which will bridge the existing gender digital divide and unemployment gap in Kawempe Division. IFU will link the trainees to various job providers like companies, organizations, banks, NGOs and government; also, a community ICT center will be established where women and girls will get the facility of computer and Internet use.

**Problem statement:** The project area in Kawempe Division, Kampala District is composed of slummy areas like Katanga, Bwaise, Kazo, Kavule with high rate of school dropout and vulnerable women and girls. Computer literacy, ICT training is very costly in these areas and not available at the community level. So, the vulnerable women/girls do not get the opportunity to access ICT facilities. IFU has taken initiatives to empower the unemployed women and girls though it does not have enough financial resources to extend support to address the issues which are important for the targeted women. It is very essential to have ICT knowledge in order to access employment opportunities at present competitive digital world. Through networking, IFU has identified the need for minimal computer and internet skill especially among the job providers like NGOs, Bank, Companies etc.).
Project Goal: To empower 200 disadvantaged unemployed young women and girls who will get employment opportunities as skilled citizens through acquiring computer and Internet training. Community women will have access to the ICT facility that will empower them socially and economically.

Project Objective:
To Create employment opportunities for unemployed disadvantaged women through providing skill training in computer/ICT and providing access to ICT facility in the community to establish their social and economic empowerment.

Project Beneficiary:
Direct beneficiaries: 200 unemployed young women
Indirect beneficiaries: 200 x 5 = 100 family members of direct beneficiaries
Job providers: 200 organizations

Project Duration: 12 months

Activities: The project will provide skill training in computer, Internet and basic training on gender issues and personal safety in workplace to unemployed young women and girls aged between 17-30 and will provide job linkage with various job provider organizations. Physically challenged (the disabled) persons from female headed households will be given priority. ICT center will be established at community level for easy access to computer and Internet use.

Course duration: 6 months for each batch

Participants for each batch: 100 participants for each batch

Long term impact: Through this project unemployed vulnerable women and girls will be skilled in computer/Internet, ICT, gender issues and personal safety. They will be able get jobs for personal and house hold income generation.

Sustainability Plan: The beneficiaries will be involved in project design which will make them own the project thus easy to replicate the project or make it exist without support or funding. There will be a revolving fund at the ICT Center through subsidized payment for services like internet use, course advancing and certificate attainment.
